FOR THE GOALS

RELATIONSHIPS WITH REGIONAL NGOS AND GOVERNMENT FOR SDG POLICY DEVELOPMENT

Benguet State University (BSU) plays a significant role in contributing to national government and regional non-government organizations' (NGOs) Sustainable Development Goals (SDG) policy development through various direct involvements and inputs. The Research and Extension with its centers serves as a dynamic sector in the university promoting sustainable development through researches conducted by the university. The Office of the Research Services promotes the generation and utilization of technologies for the benefit of the society, to manage the university experiment farms and resources therein, and to coordinate monitoring and evaluation of research and development activities. Eleven (11) researches conducted were published for Informing Policy and Practice. This bridges the gap between academic research and the local, regional and national government units to develop policies.
